Introduction

Trestle™ is a data delivery and productivity solution. The full delivery of Trestle to power governed distribution of RESO-compliant listing data continues its phased and progressive march forward.

With the Trestle latest release, Technology Providers such as yourself can subscribe to Trestle, undertake the simple configuration required to use the service, and begin making connections to license listing content from Multiple Listing Organizations.

This guide provides specific instructions to:

- [Subscribe](#) to Trestle
- Configure your [Product\(s\)](#)
- Configure your [Account](#)
- Make [Connections](#) to license content from Multiple Listing Organizations

This document also reviews guidelines to access to listing content via the WebAPI, as well as data contained in the initial RESO-compliant data feeds offered by RETS and/or WebAPI.

Trestle is a ground-breaking solution to help you author and deliver ground breaking services to your clients. Let's get started!

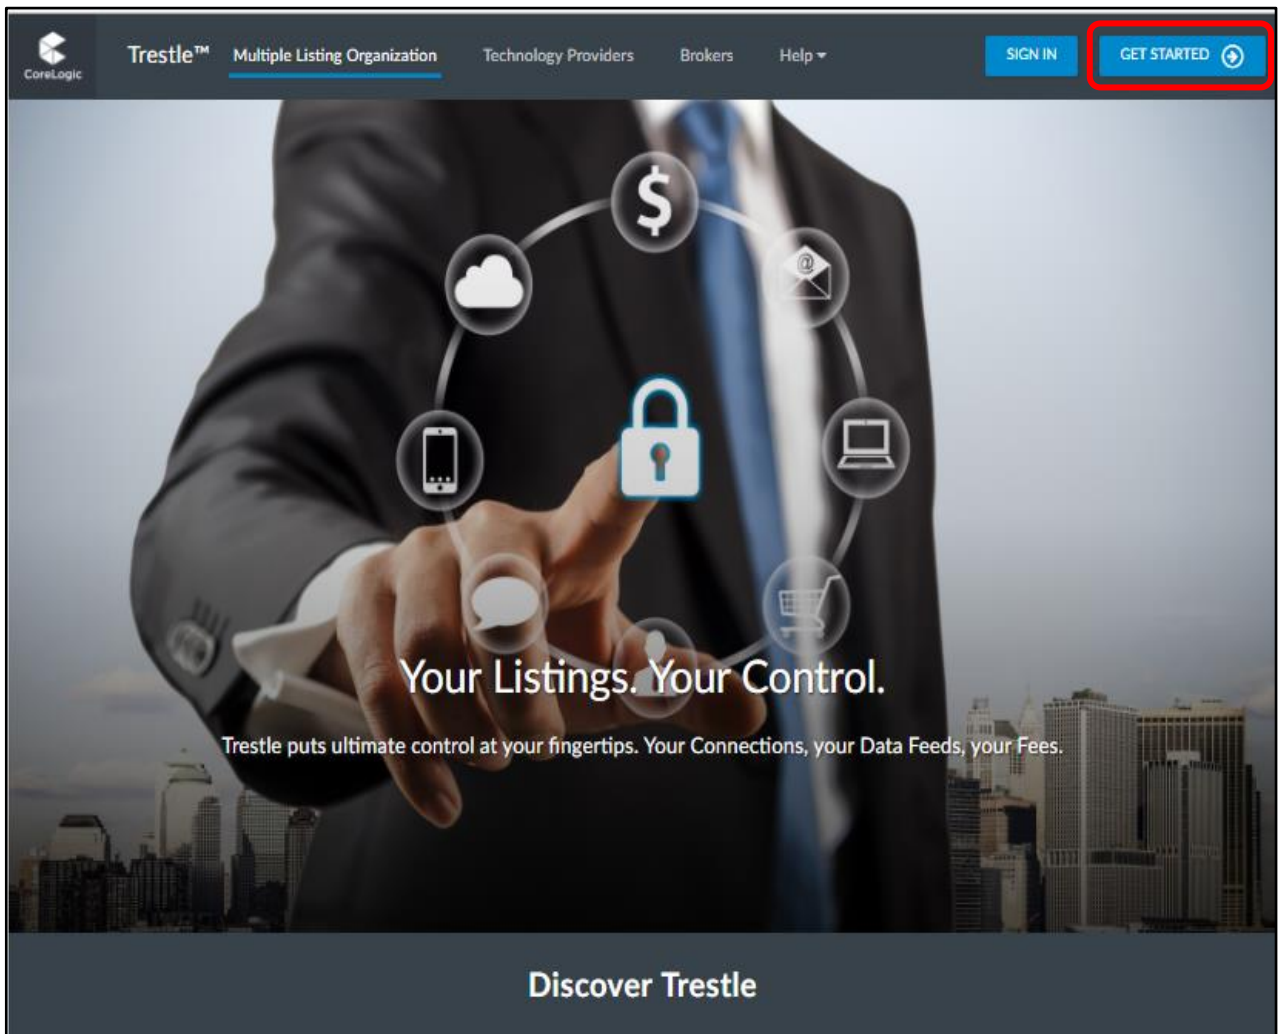

[<Top>](#)

Trestle Subscriptions

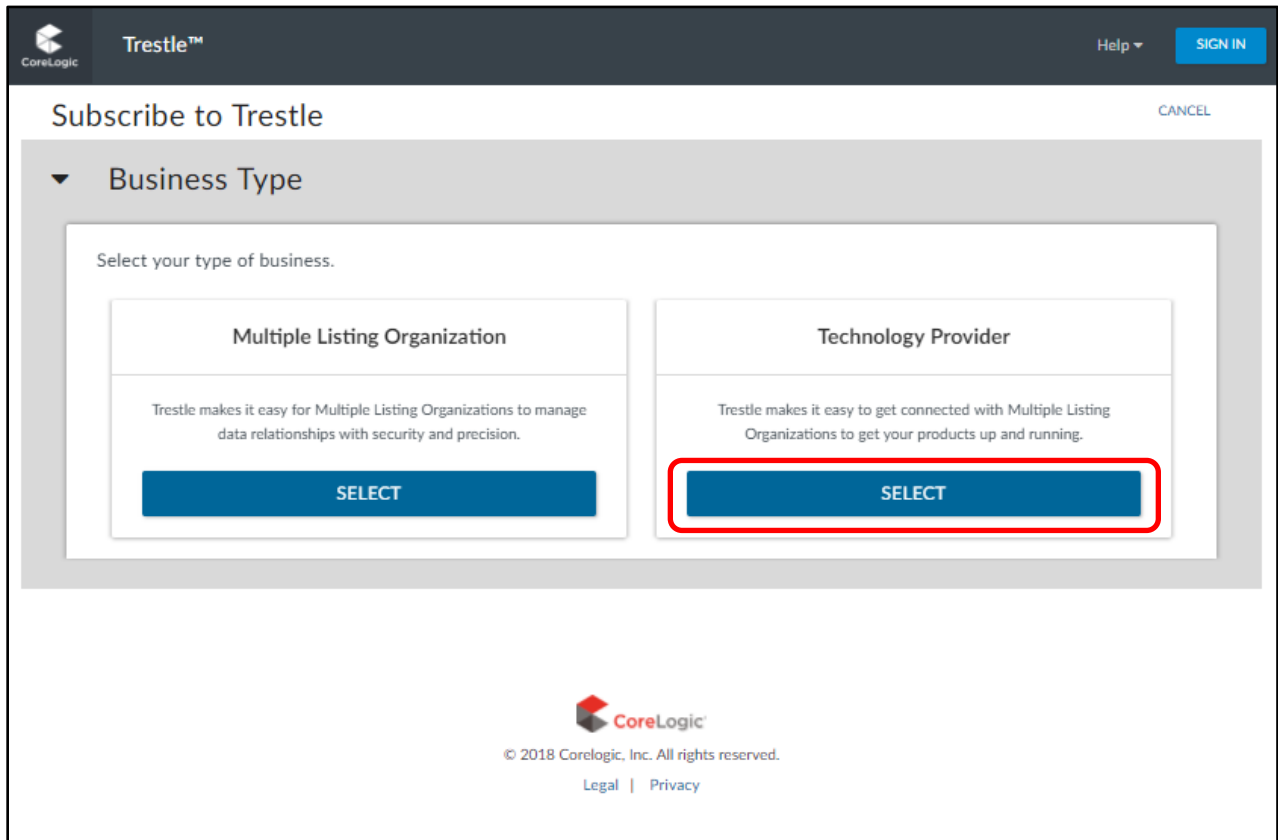

Your organization must subscribe to Trestle to undertake configuration and commence making Connections to license listing data. Trestle subscriptions are month to month, and there is no cost until one or more Connections to license data are approved.

Please follow the instructions below to subscribe to Trestle. Before you begin, please review the instructions to ensure you have gathered all the information required to successfully complete the process.

- Go to <https://trestle.corelogic.com/> and click on “Get Started”.

- Select your business type as “Technology Provider”. To continue, click the **Select** button appearing inside the Technology Provider box.

- Enter your **Primary Contact Information**. As the person completing the subscription forms, you are probably the Primary Contact who will be responsible for general administration of your organization's Trestle account.

PLEASE NOTE: The Primary Contact must be someone from your organization who has the authority to approve the Trestle subscription agreement on behalf of your company. If that is not you, please be prepared to provide that person's contact information instead.

To enhance security, a strong password is required. Note that your password must contain at least one uppercase letter, one lowercase letter, one number, and one special character (such as # or @).

When you have entered all the required Primary Contact Information, click Next.

The screenshot shows the 'Primary Contact Information' form in the Trestle™ interface. The form is titled 'Primary Contact Information' and is labeled as 'Step 2 of 4'. It includes a header with the CoreLogic logo and 'Trestle™' on the left, and 'Help' and 'SIGN IN' on the right. The main content area contains several input fields: 'FIRST NAME *', 'LAST NAME *', 'JOB TITLE', 'PRIMARY PHONE *', and 'MOBILE PHONE'. Below these is an 'IMPORTANT' note: 'This email address will be required to login to Trestle, and will be used for all communications'. This is followed by an 'EMAIL ADDRESS *' field. A password requirement note states: 'Password (minimum 6 - max 50 characters, minimum 1 Uppercase letter, 1 lowercase letter, 1 number, 1 special character from the following: @ % + \ / ! # \$ ^ ? : , () { } [] ~ ` - _ & < >]'. Below this are 'PASSWORD *' and 'CONFIRM PASSWORD *' fields. At the bottom, there is an 'EMAIL OPT-IN *' section with radio buttons for 'YES' and 'NO'. Two buttons are at the bottom: a blue 'CANCEL' button and a blue 'NEXT' button, which is highlighted with a red rectangular border. The footer includes the CoreLogic logo, '© 2018 Corelogic, Inc. All rights reserved.', and links for 'Legal' and 'Privacy'.

- Enter your **Company Information**. Be prepared to enter the full legal name of your corporation, as well as the state of incorporation.

Please also enter the signatory name, title, and email address of the person in your company who will execute data license agreements with Multiple Listing Organizations via Trestle. This will typically be the chief executive officer of your company, but might be another officer of your company.

When you have entered all the required Company Information, click **Next**.

- Trestle will display the subscription agreement after your login. Please click **I Accept** to accept the Trestle Subscription Agreement.

Welcome aboard!

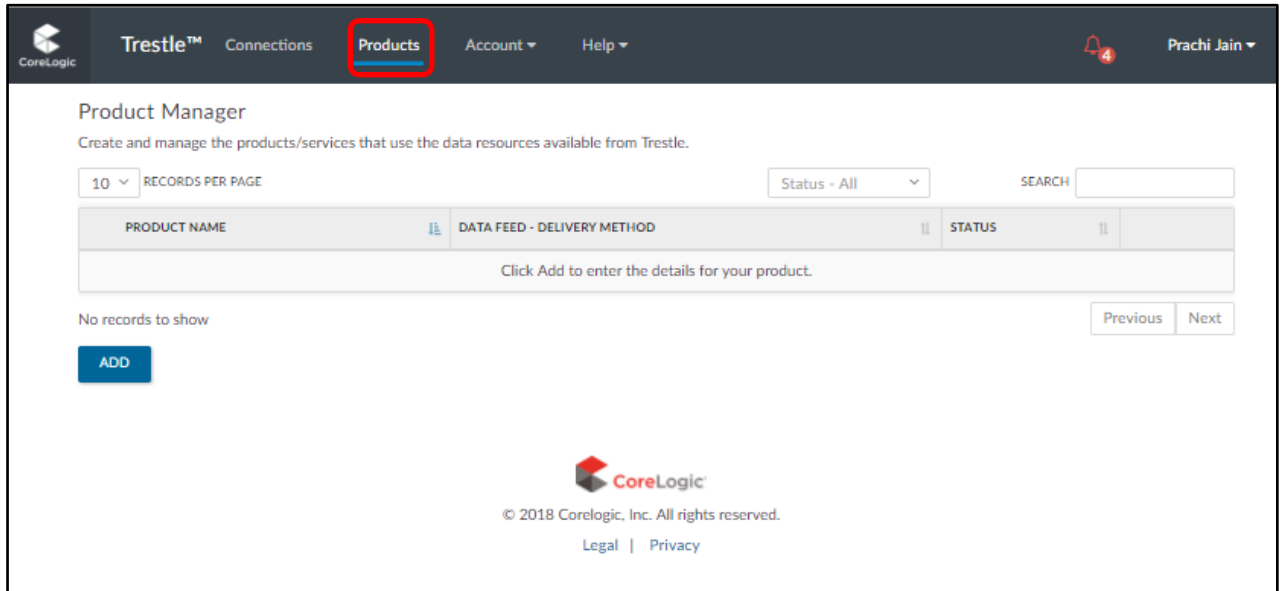

You will find the tools to support document searching, navigation, zoom, and saving a local copy of the agreement directly above the Trestle Subscriber Agreement

[<Top>](#)

Product Manager

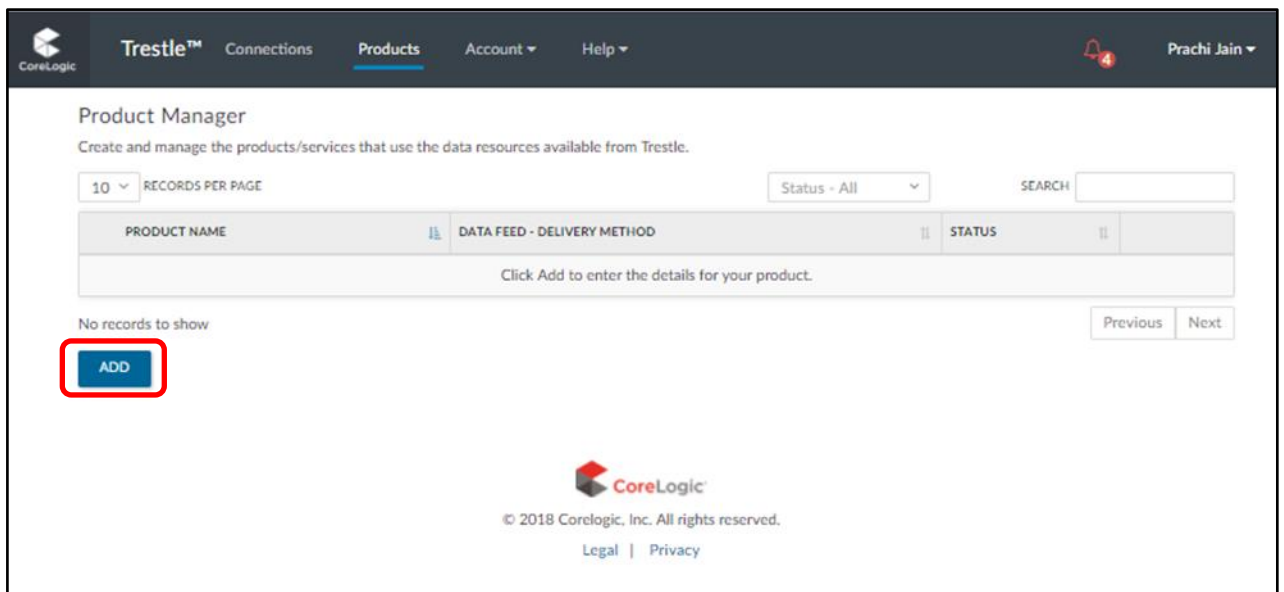

The Product Manager enables you to enter one or more products for which you may seek to license listing content via Trestle. To make Connections via Trestle and ultimately license listing content from a multiple listing organization, you must enter at least one product.

- Click on the “Products” tab in the top navigation.

- To add your first product, please click Add. Entering a product has two distinct tasks:

- Enter Product Information
- Enter Data Feed Information

Product Information

Enter the following product information:

- **Product Name**
- **Product URL/Location** with which actual services are associated
- **Product Description**
 - The product description is important as it's visible to Trestle subscribers who wish to learn more about your solution. Consider it free marketing!
 - When you initiate a Connection with a Multiple Listing Organization, the product description is automatically inserted into the data license agreement generated by Trestle. A deficient description could cause a multiple listing organization to decline your connection if it believes the product use and audience are inadequately explained.
- **Product Type** indicating if your product is a Web, Desktop or Mobile solution
- **Product Status** indicating whether the product is In Development or In Production
- **NOTE:** Product Active field is automatically updated by Trestle; it appears for informational purposes only.

When the product information has been entered, you may click “**Add RESO Data Feed**” or “**Add RETS Data Feed**” to associate one or more data feeds to the product. Clicking **Add** automatically saves the product information you already entered. However, if you choose to add a data feed later and do not click **Add**, please be sure to click **Save**.

Lastly, Multiple Listing Organizations typically require a separate data license for each product using their listing content. As a result, Trestle does not permit a single Connection to cover multiple products.

Data Feed Information

Trestle currently supports the following data feeds:

- RESO Compliant Data Feeds
 - IDX via RETS and/or API
 - IDX Plus via RETS and/or API
 - VOW via RETS and/or API
 - Statistics via RETS and/or API
 - **NOTE** - IDX includes solely active listings and the related, relevant fields. IDX Plus is distinguished from IDX simply by the availability of sold listings and the addition of related fields.
- Matrix Native RETS Data Feeds
 - IDX via RETS
 - IDX Plus via RETS
 - **NOTE** – These feeds allow a Technology Provider to request a data feed to the Native RETS

server

In subsequent releases, Trestle will also offer data feeds tailored to support:

- Broker back office
- Syndication
- And many more

While Data Feeds such as IDX and IDX Plus are delivered in a unified and consistent manner across all multiple listing organizations, please recognize that individual multiple listing organizations may further refine their own Data Feeds via Trestle by suppressing access to certain fields.

To view details on how to connect to either of the data feeds see below

Add RESO Data Feed

After clicking “Add RESO Data Feed”, select the feed you would like to connect to. Both the feed ID and feed password will be assigned upon creation.

- Select a Data Feed from the drop-down list
- Click Save button
- You will be prompted confirm and be reminded passwords will not be visible or retrievable after feed creation

Add Data Feed for : Test Vendor Feed

Please select the data feed that your product supports and enter the required credential information.

DATA FEED *

CANNOT BE CHANGED AFTER SAVING.

ID ID WILL BE GENERATED UPON SAVING AND WILL BE VIEWABLE ON DEMAND.

PASSWORD PASSWORD WILL BE GENERATED UPON SAVING.

PASSWORD WILL ONLY DISPLAY ONCE.

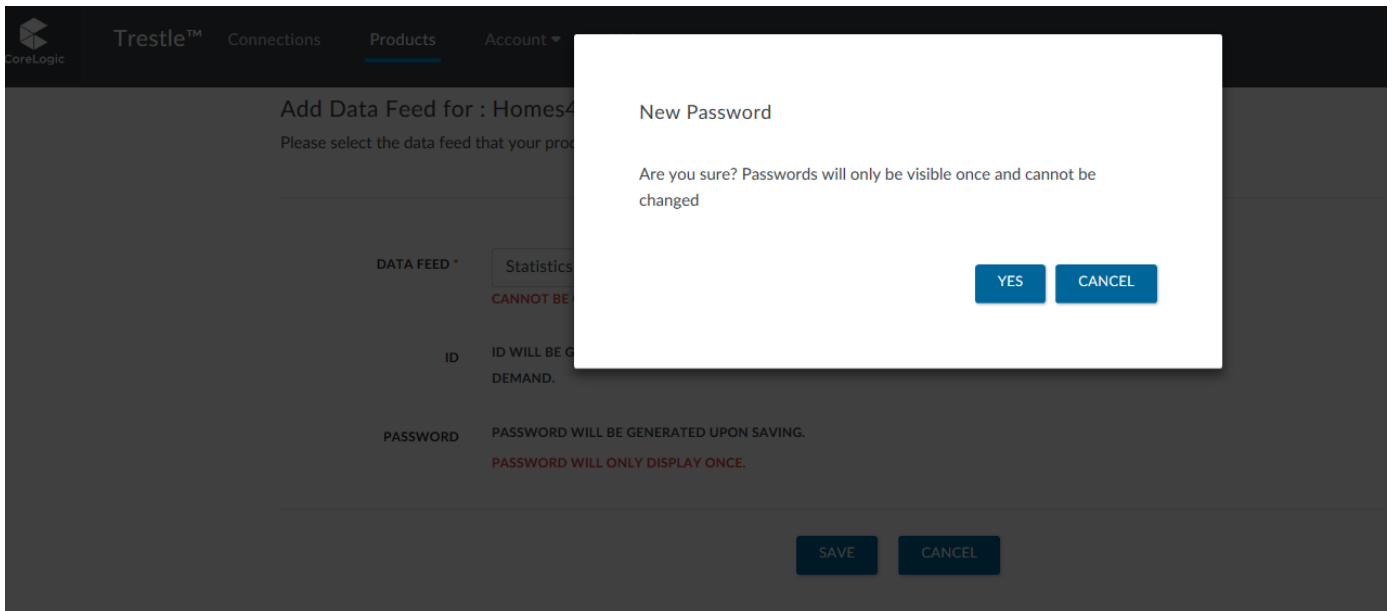

© 2018 Corelogic, Inc. All rights reserved.

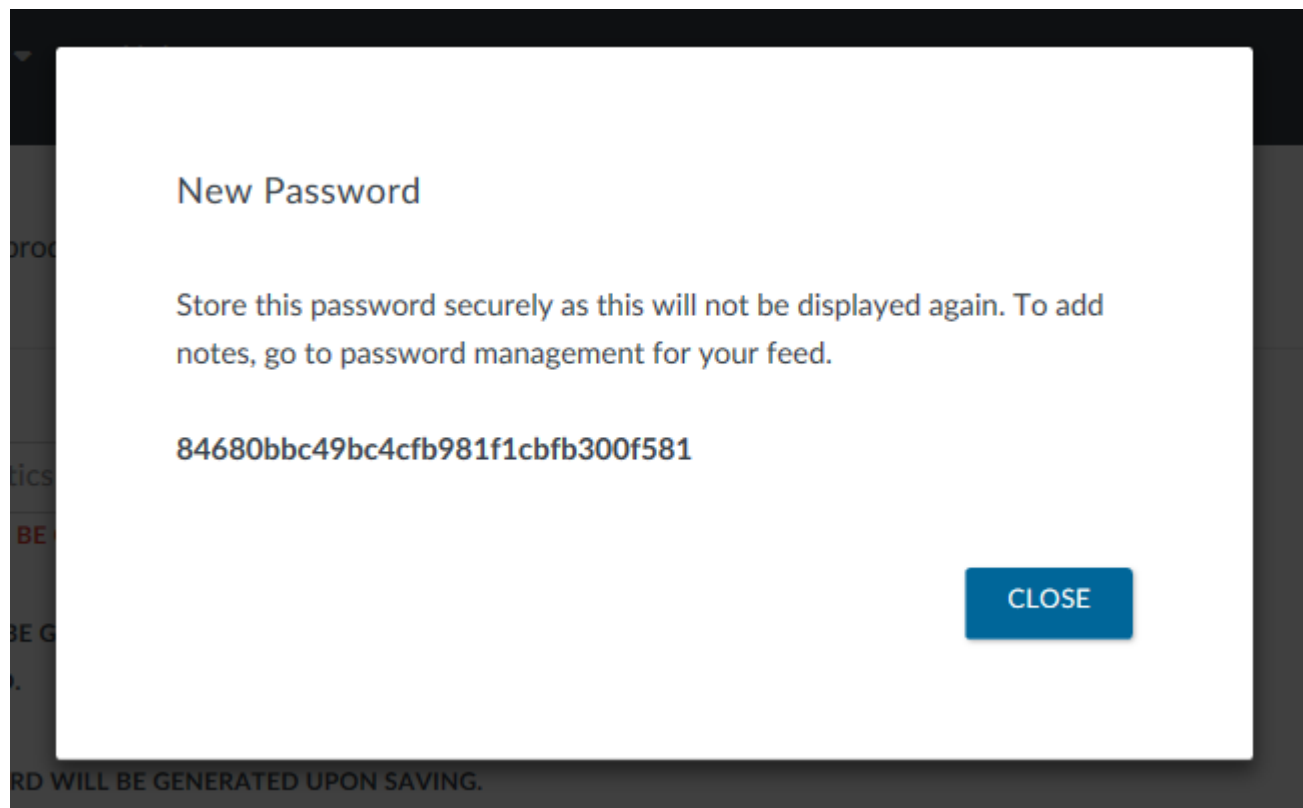

[Legal](#) | [Privacy](#)

When you are done associating a Data Feed to your Product, click **Save**.

After you save you will be prompted to confirm and prepare to save your secure password.

Your password will appear temporarily with enough time to save in a secure place. After that it will no longer be visible or retrievable. Passwords currently default to expire after one year and will need to be reset upon expiration.

Once a feed has been associated, an additional password and other functions can be added from the credential manager, found within the product manager.

Credential Manager

Navigate to product manager > scroll down to feed you'd like to manage or review > select manage > from there make changes and additions as needed.

Within the Credential Manager a user can:

- Review the credential id associated with a product/feed combination
- Add notes per credential
- View creation and expiration date
- Reset or Delete a password
- Add additional credentials (maximum of two per product/feed combination)

**DATA ACCESS AGREEMENT
(TRESTLE)**

This Data Access Agreement (“Agreement”) is entered into between *****Austin MLS (SAMPLE DATA)***** (“Multiple Listing Organization”), a(n) North Carolina corporation or company, and XYZ (“Technology Provider”), a(n) California corporation or company, and is effective as of the date of the last signature below (“Effective Date”).

The parties agree as follows:

1. DEFINITIONS

1.1 “Authorized Broker” means a Participant identified in any Broker Authorization Form between said Participant and Multiple Listing Organization.

1.2 “Broker Authorization Form” means the separate form by which Multiple Listing Organization authorizes Technology Provider to provide the Product to a specified Authorized Broker. For the avoidance of doubt, (i) a Broker Authorization Form may be entered into on and/or after the Effective Date of this Agreement, and (ii) there may be multiple Broker Authorization Forms throughout the course of this Agreement.

1.3 “Listing Data” means the multiple listing data specified in Exhibit A.

1.4 “Participant” means a participant of Multiple Listing Organization, as defined in the Policies.

1.5 “Policies” means the Rules and Regulations and any operating policies of Multiple Listing Organization, as may be amended from time to time.

1.6 “Product” means Technology Provider’s product or service identified at Exhibit A.

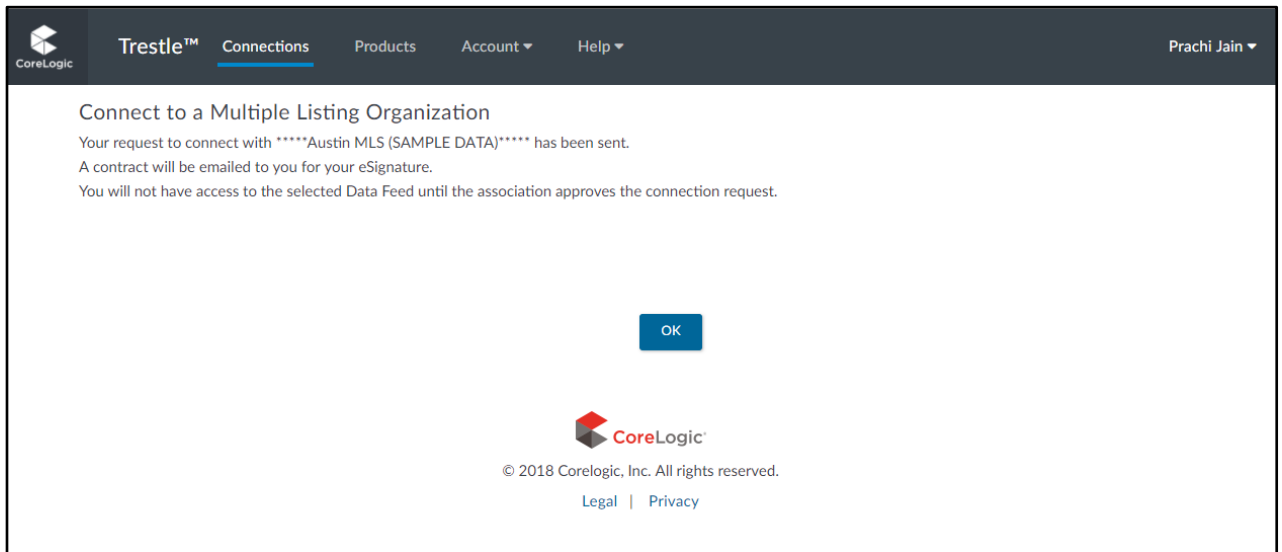

1.7 “Trestle” means CoreLogic’s platform that aggregates multiple listing data and facilitates access and distribution of the Listing Data.

2. OWNERSHIP

Technology Provider acknowledges that ownership and use rights relating to copyrights in the Listing Data are defined in the Policies. Technology Provider shall not challenge or take any action inconsistent with Multiple Listing

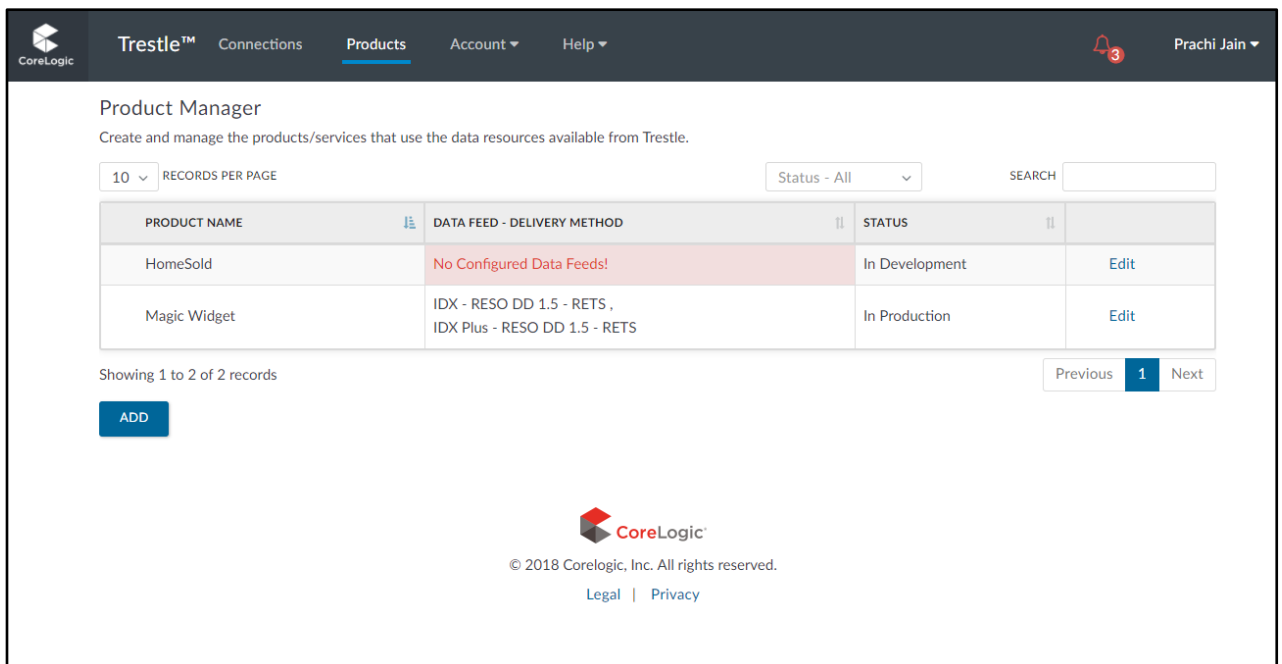

CoreLogic

[Legal](#) | [Privacy](#)

- Once you click Connect, your request will be sent to the MLO and a contract will be emailed to you for eSignature.

- These simple steps enable to you initiate a RETS data feed Connection with a Multiple Listing Organization with speed and assurance.

As pictured here, the Product Manager displays the Data Feed you newly associated with the product, along with any other Data Feeds you previously associated.

Notice the highlighting on the first configured product as pictured here. Trestle warns you when no Data Feed has been associated with that product, which precludes any possibility of using that product to

Connect with a multiple listing organization. Click **Edit** to modify the product and **Add** an associated Data Feed.

Please also note that a Multiple Listing Organization may not choose to support a Data Feed for which your product is configured. You are welcome to add as many Data Feeds as you wish to your product, but please recognize that it is your responsibility to manage use of multiple Data Feeds through your implementation.

Trestle enables you to **Delete** a Product that is no longer relevant, provided it has no associated Data Feed or active Connection.

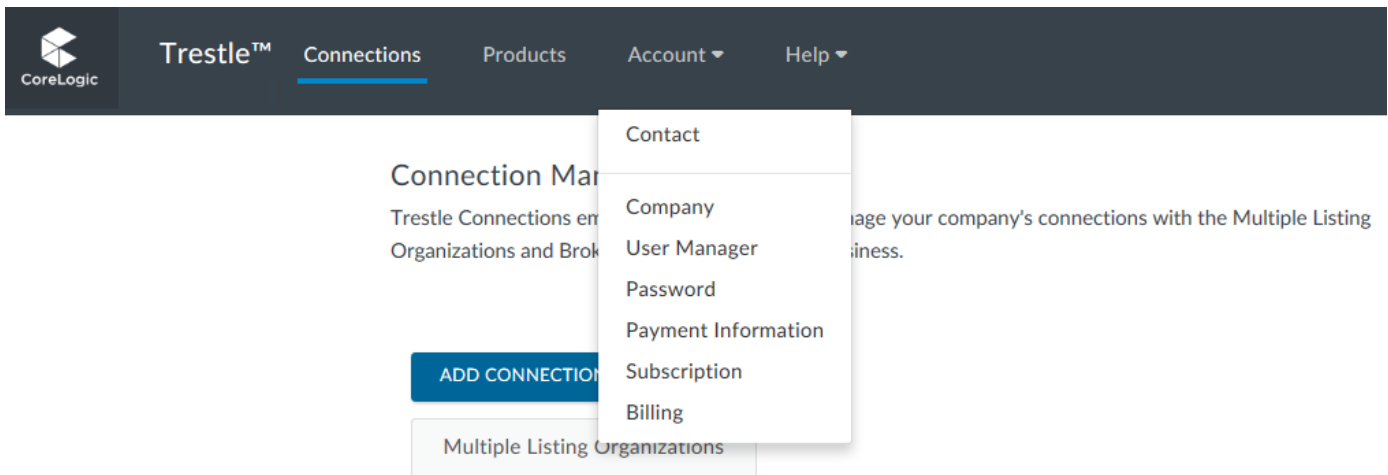

[<Top>](#)

Account Manager

Some account information is furnished during the subscription process. The Account Manager enables you to control that and other information about your organization that is vital for the operation of Trestle.

Specifically, you can manage:

- **Contact** for the individual managing Trestle on behalf of your organization.
- **Company** conveys information about your company to Multiple Listing Organizations and Brokers who may wish to connect via Trestle.
- **User Manager** allows the individual managing Trestle to create additional users for their Trestle account. Hence, allowing multiple members to have access to the TP's Trestle account.
- **Password** to change or update your Trestle credentials.
- **Payment Information** manages credit card data for fees that are payable to CoreLogic for use of Trestle or to Multiple Listing Organizations for data access.
- **Subscription** to review the Trestle subscription agreement.
- **Billing** to view charges via receipt or statements processed by CoreLogic and your connected MLOs

Again, we encourage all subscribers to provide a thoughtful description of their company and to incorporate a logo. The dimensions of a logo for use on Trestle should not exceed 128 x 128.

User Manager

MLOs and Technology Providers can now create additional users for their Trestle account. This will allow multiple staff members to have access to the MLO/TP's Trestle account.

To create an additional user for your account, complete the following steps:

- Select "User Manager" from the "Account" Menu.

The screenshot shows the Trestle™ Account menu. The 'Account' dropdown is open, and 'User Manager' is highlighted. Below the menu, the 'User Manager' section is visible, including an 'ADD USER' button, a 'RECORDS PER PAGE' dropdown set to 10, a search bar, and a table with one record for 'TP Demo Account'.

USER'S NAME	EMAIL	ROLE	STATUS	
TP Demo Account	trestle.demotp@gmail.com	Owner	Pending	Edit

- Once in the User Manager, click on "Add User".

The screenshot shows the Trestle™ User Manager page. The 'ADD USER' button is highlighted with a red box. Below the button, there is a 'RECORDS PER PAGE' dropdown set to 10, a search bar, and a table with one record for 'Prachi Jain'.

USER'S NAME	EMAIL	ROLE	STATUS	
Prachi Jain	prachi_jain@hotmail.com	Owner	Active	Edit

- Complete the required User Information for the new user and click “Save”.

Connections

In short “Making Connections” is how Trestle transports your business forward.

In all cases, new Connections are initiated by you, the Technology Provider, when you wish to license listing data from a specific Multiple Listing Organization. The Connection process is designed to facilitate speed, accountability, transparency, and efficiency. Trestle supports the full life cycle pertaining to the Connection relationship, including contract generation, execution, and storage; ongoing access to listing content; as well as ongoing e-commerce processing for service fees.

Connection Manager

The main page of the Connection Manager displays all Connections and their status whether approved, pending, or declined. Connections are dictated by Product, feed type/delivery, and MLO combination.

MULTIPLE LISTING ORGANIZATION / LOCATION	PRODUCT	DATA FEED - DELIVERY	CONTRACT TYPE	CONTRACT STATUS	ORIGINATING ID
Northwest Louisiana Assn of REALTORS, Shreveport, LA	Homes4Sale	IDX - RETS	4 Party	⚠️ 2	NWLA
Central Virginia Regional MLS	FAR IDX	IDX Plus - RETS	4 Party	⚠️ 1	CVR

Within each connection, there will also appear contract statuses. A connection may be approved, but contracts will continue to be requested within that connection. The status of these corresponding contracts can be seen at a glance in the Connection Manager, and in more detail within Connection Details.

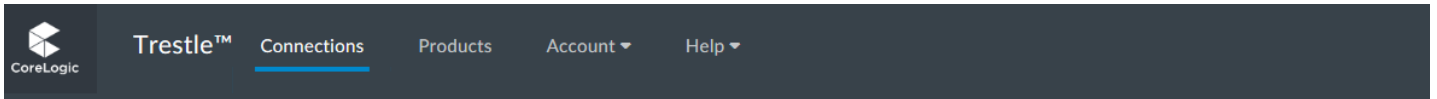

Connection Details

Click on the name of any MLO to navigate to the Connection Details. From Connection Details you can:

- View details such as product name, connection status, and more.
- Review fee breakdown of connection

- Review contracts. For multi-party contracts this is where additional contracts can be requested for an existing connection.
- Message MLOs for any communications regarding your connection or contracts.

PREVIEW CONTRACT

Once you've added all necessary information and signers, you can preview the contract and move forward as with any connection.

Adding a New Connection

To establish a new Connection entails a few simple steps. Sequentially, the steps are:

- Click the **Add Connection** button to initiate a new Connection.

The screenshot shows the 'Connection Manager' page in the Trestle™ interface. The navigation bar at the top includes 'CoreLogic', 'Trestle™', 'Connections' (highlighted), 'Products', 'Account', 'Help', and the user name 'Prachi Jain'. The main content area is titled 'Connection Manager' and contains the text: 'Trestle Connections empower you to view and manage your company's connections with the Multiple Listing Organizations and Brokers helping you conduct business.' A blue button labeled 'ADD CONNECTION' is highlighted with a red rectangular box. Below this button are two tabs: 'Multiple Listing Organizations' (active) and 'Participating Brokers - Coming Soon'. The interface includes a 'RECORDS PER PAGE' dropdown set to '10', a filter dropdown set to 'All', and a search input field. A table header is visible with columns: 'MULTIPLE LISTING ORGANIZATION / LOCATION', 'PRODUCT', 'DATA FEED - DELIVERY', 'CONTRACT TYPE', and 'CONTRACT STATUS'. Below the table, it says 'Click Add to connect your product to a Multiple Listing Organization'. At the bottom of the table area, it displays 'No records to show' and 'Previous' and 'Next' navigation buttons. The footer contains the CoreLogic logo, copyright information '© 2018 Corelogic, Inc. All rights reserved.', and links for 'Legal' and 'Privacy'.

- Select the Product you previously configured for which you wish to establish a Connection.

The screenshot shows the Trestle™ Connections interface. At the top, there is a navigation bar with the CoreLogic logo, 'Trestle™', and menu items for 'Connections', 'Products', 'Account', and 'Help'. The user's name 'Prachi Jain' is visible in the top right corner. The main heading is 'Connect to a Multiple Listing Organization' with the sub-heading 'Step 1 - Select a product'. Below this, there are controls for 'RECORDS PER PAGE' (set to 10), 'Status - All', and a 'SEARCH' field. A table lists two products: 'HomeSold' and 'Magic Widget'. Each product row has a blue 'SELECT' button to its right, which is highlighted with a red rectangular box. Below the table, it says 'Showing 1 to 2 of 2 records' and includes 'Previous', '1', and 'Next' navigation links. A 'CANCEL' button is located at the bottom left. The footer contains the CoreLogic logo, copyright information '© 2018 Corelogic, Inc. All rights reserved.', and links for 'Legal' and 'Privacy'.

- Click **Select** adjoining the Multiple Listing Organization from whom you wish to license listing data. Note that you can expand the number of Multiple Listing Organizations displayed on the page, filter the list by state, or search for a specific Multiple Listing Organization by name.

The main content area is titled "Connect HomeSold to *****Austin MLS (SAMPLE DATA)*****" and indicates "Step 6 - Review and Connect." Below this title, there are two buttons: "CANCEL" and "CONNECT". The "CONNECT" button is highlighted with a red rectangular box. Below the buttons is a preview of a document titled "DATA ACCESS AGREEMENT (TRESTLE)". The document text includes the following sections:

DATA ACCESS AGREEMENT (TRESTLE)

This Data Access Agreement ("Agreement") is entered into between *****Austin MLS (SAMPLE DATA)***** ("Multiple Listing Organization"), a(n) North Carolina corporation or company, and XYZ ("Technology Provider"), a(n) California corporation or company, and is effective as of the date of the last signature below ("Effective Date").

The parties agree as follows:

1. DEFINITIONS

1.1 "Authorized Broker" means a Participant identified in any Broker Authorization Form between said Participant and Multiple Listing Organization.

1.2 "Broker Authorization Form" means the separate form by which Multiple Listing Organization authorizes Technology Provider to provide the Product to a specified Authorized Broker. For the avoidance of doubt, (i) a Broker Authorization Form may be entered into on and/or after the Effective Date of this Agreement, and (ii) there may be multiple Broker Authorization Forms throughout the course of this Agreement.

1.3 "Listing Data" means the multiple listing data specified in Exhibit A.

1.4 "Participant" means a participant of Multiple Listing Organization, as defined in the Policies.

1.5 "Policies" means the Rules and Regulations and any operating policies of Multiple Listing Organization, as may be amended from time to time.

1.6 "Product" means Technology Provider's product or service identified at Exhibit A.

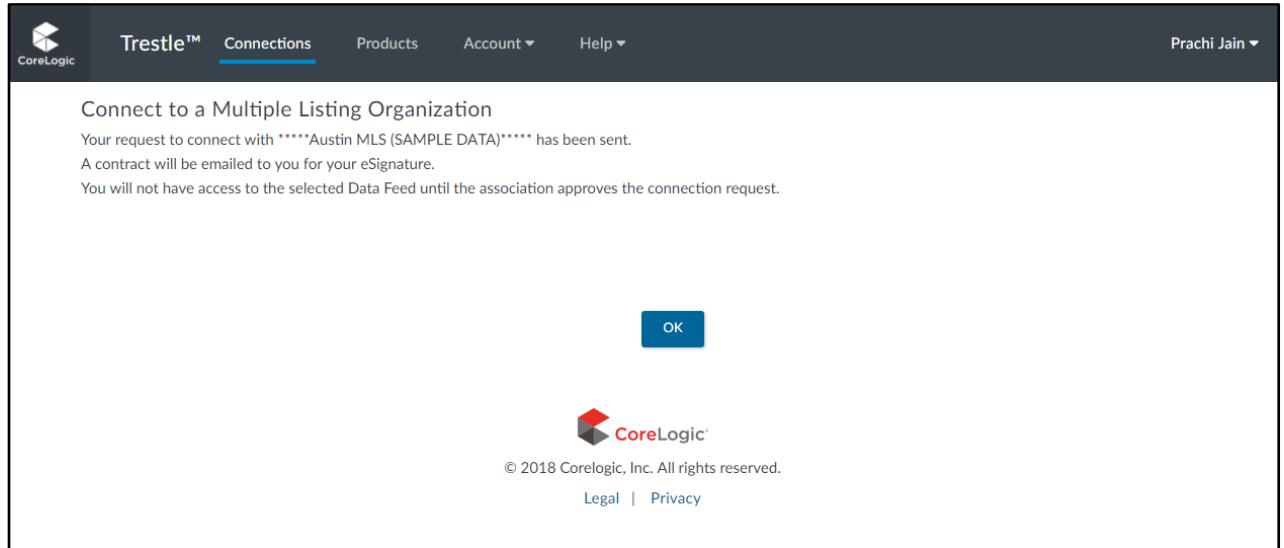

1.7 "Trestle" means CoreLogic's platform that aggregates multiple listing data and facilitates access and distribution of the Listing Data.

2. OWNERSHIP

Technology Provider acknowledges that ownership and use rights relating to copyrights in the Listing Data are defined in the Policies. Technology Provider shall not challenge or take any action inconsistent with Multiple Listing

At the bottom of the document preview, the CoreLogic logo is displayed, along with the text "© 2018 Corelogic, Inc. All rights reserved." and links for "Legal" and "Privacy".

- Once you click Connect, your request will be sent to the MLO and a contract will be emailed to you for eSignature.

- These simple steps enable to you initiate a Connection with a Multiple Listing Organization with speed and assurance.

E-Signature Processing

A moment after you initiate a Connection, Trestle automatically emails an e-signature ready copy of the contract to the Signor identified for your company during the Trestle subscription process.

Then, after the Signor for your company has e-signed the agreement, it is automatically emailed to the designated individual within the corresponding Multiple Listing Organization for his or her counter-signature.

**DATA ACCESS AGREEMENT
(TRESTLE)**

This Data Access Agreement ("Agreement") is entered into between *****Austin MLS (SAMPLE DATA)***** ("Multiple Listing Organization"), a(n) North Carolina corporation or company, and XYZ ("Technology Provider"), a(n) California corporation or company, and is effective as of the date of the last signature below ("Effective Date").

The parties agree as follows:

1. DEFINITIONS

1.1 "Authorized Broker" means a Participant identified in any Broker Authorization Form between said Participant and Multiple Listing Organization.

1.2 "Broker Authorization Form" means the separate form by which Multiple Listing Organization authorizes Technology Provider to provide the Product to a specified Authorized Broker. For the avoidance of doubt, (i) a Broker Authorization Form may be entered into on and/or after the Effective Date of this Agreement, and (ii) there may be multiple Broker Authorization Forms throughout the course of this Agreement.

1.3 "Listing Data" means the multiple listing data specified in Exhibit A.

1.4 "Participant" means a participant of Multiple Listing Organization, as defined in the Policies.

1.5 "Policies" means the Rules and Regulations and any operating policies of Multiple Listing Organization, as may be amended from time to time.

1.6 "Product" means Technology Provider's product or service identified at Exhibit A.

1.7 "Trestle" means CoreLogic's platform that aggregates multiple listing data and facilitates access and distribution of the Listing Data.

2. OWNERSHIP

Technology Provider acknowledges that ownership and use rights relating to copyrights in the Listing Data are defined in the Policies. Technology Provider shall not challenge or take any action inconsistent with Multiple Listing Organization's ownership of or rights in the Listing Data.

3. LICENSE AND PERMITTED USE

3.1 License Grant. Subject to the terms and conditions of this Agreement, Multiple Listing Organization grants to Technology Provider a non-exclusive, non-transferable, non-sublicensable, limited license to use the Listing Data in accordance with the terms and conditions of this Agreement. There are no implied licenses under this Agreement. All rights not expressly granted herein are reserved.

3.2 Compliance with Policies. Technology Provider shall comply with the Policies at all times. In the event of any perceived conflict between the Policies and this Agreement, the Policies shall govern.

3.3 Permitted Use. Technology Provider is authorized to use the Listing Data in connection with the Product. Technology Provider may provide the Product to (select one):

Zoom Page (1 of 6) Options Help

PLEASE NOTE: The e-signature process is sequential in that the contract is not emailed to the Multiple Listing Organization until your company has applied its e-signature.

The invitations to e-sign are sent by our e-signature provider, Authentisign. Each email includes a link to a page, as pictured above, through which each recipient completes the signing process.

During the e-signature phase, the status appearing on the Connection Manager clearly describes the

signing status. It reflects **Pending** if the contract is awaiting Technology Provider or Multiple Listing Approval and e-Signature.

Shortly after the contract is executed by the Multiple Listing Organization, the Connection Manager will be updated to display that the Connection is **Approved**

Data Feed Inception

If the Connection is approved and not subject to a 3-way agreement, the data feed is promptly and automatically enabled.

If the Connection is subject to a 3-way agreement, no data will be accessible until one or more Brokers have provided their authorization via Trestle.

It is important to recognize that the Data Feeds via Trestle are unified across Multiple Listing Organizations. For example, a newly minted Connection for an IDX RETS Data Feed via Trestle will be added into our existing IDX RETS feed, should one have been previously established through earlier Trestle Connections.

Declined Connections

A signor from your company may reject a data access agreement during the e-signing process. In that case, the Connection status displayed by Trestle will be **Declined – Technology Provider**.

A Multiple Listing Organization may also Reject or Decline a Connection with your company or product via Trestle. In that case, the Connection status displayed by Trestle will be **Declined – Multiple Listing Organization**. In the event they do so, please contact the Multiple Listing Organization directly for further information.

[<Top>](#)

Transport Mechanisms

Two transport APIs enable solutions to connect, request, and consume data feeds. The mechanisms are:

- The WebAPI, a RESTful API based on the Real Estate Standards Organization's (RESO) WebAPI 1.0.2 specification and OData 4.0
- The RESO Real Estate Transaction Standard (RETS) API, an older API based on the RESO RETS 1.8 specification.

Both transport mechanisms return data based upon RESO Data Dictionary 1.5 schema specification at the time of this publication. Support for 1.6 and future versions will be included as the standards evolve, and

new versions are ratified by RESO.

Rather than provide extensive documentation for these standards directly herein, Technology Providers are encouraged to review the documentation directly on the RESO site; a great deal of time and care has gone into the creation of these standards, and the support information regarding their purpose and use is best viewed at the source.

- WebAPI v. 1.0.2 documentation: <https://www.reso.org/reso-web-api/>
- RETS 1.8 documentation: <https://www.reso.org/specifications/>
- RESO Data Dictionary documentation: <https://www.reso.org/data-dictionary/>

Both transport mechanisms require client software to connect, authenticate, and query the underlying Trestle data sources. There are multiple clients available for download for free or for a license fee; further, reference implementations and documentation can be found on reso.org if you choose to develop your own client. CoreLogic recommends RETS Connector (<http://retsconnector.com>) for use with the RETS API.

Web API Connection

The WebAPI uses a variation of the OAuth2 specification [[RFC-6749](#)] for generating request authorization. To initiate:

1. Make a POST request to <https://trestle.corelogic.com/oidc/connect/token> with the following request body:

```
scope=api&client_secret=[secret]&grant_type=client_credentials&client_id=[client id]
```

Replace the **[secret]** and **[client id]** parameters with the values you entered via the Trestle Product Manager.

2. The response contains an OAuth2 authorization response in the form:

```
{  
  "access_token": "[ACCESS TOKEN]", "expires_in": 3600,  
  "token_type": "Bearer"  
}
```

Note – The WebAPI authorization does not currently support token refresh.

Service Model

The service model for the WebAPI can be accessed via a GET request to:

[https://trestle.corelogic.com/odata/\\$metadata](https://trestle.corelogic.com/odata/$metadata) (authorization is required).

Search

Search requests are made via the OData **\$filter** parameter. \$filter queries use the syntax described in section **11.2.5.1.1** of the OData specification, along with [examples](#).

To initiate a search request:

1. Make a GET request to

[https://trestle.corelogic.com/odata/\[model name\]?\\$filter=\[query\]](https://trestle.corelogic.com/odata/[model name]?$filter=[query])

The **[model name]** should be replaced with a model exposed in the service model, and **[query]** replaced with a valid \$filter query.

2. The response will be a JSON object Notes:

- No **string functions** are currently implemented.
- The additional system query options currently available are **\$top**, **\$count**, and **\$select**.

RETS

RETS Sample Search Query

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=COMPACT&Query=\(ModificationTimestamp=TODAY%2B\),\(MIsStatus=A,X,W,I\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=COMPACT&Query=(ModificationTimestamp=TODAY%2B),(MIsStatus=A,X,W,I))

Basic Search Arguments

SearchType=Property

This designates the Resource to search and for this example the Property resource is desired.

&Class=PROPERTY

This designates the Class to search and in this example Property is the only Class in the Property Resource

&QueryType=DMQL 2

This designates the RETS query language as DMQL2 and is the advised query language from the standard

&Limit=20

This designates the maximum number of records to return to the client for the request

&StandardNames=DataDictionary:1.5

This designates that the client is using Standard Names for the fields within the Property resource and

class. This example declares Data Dictionary 1.5 standard names.

&Format=COMPACT

This designates that the client wants records returned using the COMPACT data format. This is the advised format to use.

&Query=(ModificationTimestamp=2016-01-01%2B),(Mls Status=Expired),(ListPrice=200000-300000)

The Query argument designates the search criteria to use for the request. The following covers how to use fields of different types and logical operations using the DMQL2 query language.

Query Fields by Data Type

Integer

For fields that represent an Integer value such List Price below, the number must be non- negative and have no decimal points.

(ListPrice=200000),

Integers may also be searched using less than, greater than, and range values as follows below.

(ListPrice=300000-), (ListPrice=200000+), (ListPrice=200000-300000),

Please note that the '+' symbol must be URL encoded as '%2b' or it will not be recognized.

Integer Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=COMPACT&Query=\(ListPrice=200000-300000\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=COMPACT&Query=(ListPrice=200000-300000))

Decimal

For fields which represent a Decimal value such as Lot Size Acres below, the number must be non-negative and only have as many decimal points as the field Precision in the metadata. For the following example the Precision is 3.

(LotSizeAcres=0.171),

Decimal value may also be searched using less than, greater than, and range values as follows below.

(LotSizeAcres=0.201-), (LotSizeAcres=0.101+), (LotSizeAcres=0.101-0.201),

Please note that the '+' symbol must be URL encoded as '%2b' or it will not be recognized.

Decimal Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=\(LotSizeAcres=0.101-0.201\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=(LotSizeAcres=0.101-0.201))

Date Time

For fields that represent a Date and Time value the format is represented as YYYY-MM-DDTHH:MM:SS where the 'T' is literal.

(ModificationTimestamp=2016-01-01%2B),

Date Time Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=\(ModificationTimestamp=2016-01-01%2B\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=(ModificationTimestamp=2016-01-01%2B))

Boolean

For fields that represent a boolean True or False value, the format is represented as Y or N in the criteria.

(GarageYN=Y)

Boolean Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=\(GarageYN=Y\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=(GarageYN=Y))

String

For fields that represent free form text the value may be searched using a literal string or wildcards.

(ListAgentURL=*realestate*)

String Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=\(ListAgentURL=*realestate*\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=(ListAgentURL=*realestate*))

Lookup

For fields that represent a single value selected out of a set of possible values, a Lookup, the value used must match one of the possible values from the field metadata.

(MlsStatus=Expired)

Lookup Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=\(MlsStatus=Expired\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO MPACT&Query=(MlsStatus=Expired))

PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=CO
MPACT&Query=(MlsStatus=Expired)

Multiple Selection Lookup

For fields that represent one or more values selected from a set of possible values, a Lookup- Multi, the value or values used must match one of the possible values from the field metadata.

(PoolFeatures=|P,Q)

Multiple Selection Example:

[https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=COMPACT&Query=\(PoolFeatures=|P,Q\)](https://trestle.corelogic.com/RETS/Search/Search.aspx/Search?SearchType=Property&Class=PROPERTY&QueryType=DMQL2&Limit=20&StandardNames=DataDictionary:1.4&Format=COMPACT&Query=(PoolFeatures=|P,Q))

Query Logical Operations

To combine two criteria together into a single query statement, use the AND operator. This may be represented as 'AND' or ',' in the query string as follows.

(ModificationTimestamp=2016-01-01%2B),(MIsStatus=Expired) (ModificationTimestamp=2016-01-01%2B)AND(MIsStatus=Expired)

To separate two criteria into separate statements, use the OR operator. This may be represented as 'OR' or '|' in the query string as follows.

(GarageYN=Y)OR(PoolFeatures=|P,Q) (GarageYN=Y)|(PoolFeatures=|P,Q)

To exclude specific criteria values, use the NOT operator. This may be represented as 'NOT' or '~' in the query string as follows.

NOT(MIsStatus=Expired)

~(MIsStatus=Expired)

Query statements can be grouped as needed using parentheses as follows.

NOT(MIsStatus=Expired) AND ((ModificationTimestamp=2016-01-01%2B) AND ((GarageYN=Y)OR(PoolFeatures=|P,Q)))

Please Note: The spaces above are for clarity only and should not be used in practice.

Examples

Additional search examples follow:
